PROBLEM STATEMENT

Domain : Cloud Application Development

Title : Inventory Management For Retailer

SANKARA NARAYANAN S

1. Make a reminder of the auto delivery feature of products to respective customers.
2. Add a feature for pre-request of orders and blocking the inventory for smoothness based on first come first serve.
3. Make the inventory automated to do things without delay.
4. Deploy the application with real time data to determine the success rate.

SHIVANEESH A

1. Updating Cost of Each Product on weekly basis
2. Proofing the Labels in Products
3. Updating the expires dates in the System
4. Maintaining the Products in the shop

SAMYUKTHA GS

1.Get feedback from various products using customers.

2.To break the lack of supply chain if it happens.

3. Verify accuracy with regular counts.

4. Set reorder points for each product.5.Take forecasting seriously.

PAVITHRAN VV

1. Knowing the necessity of the customer
2. Ordering more fast moving products
3. Getting feedback from the customers
4. Add reviews section in a product page

PRIORITIZATION

1. Customer Preference
2. Quality Analysis
3. Top Notch Delivery
